

REMARKS

Regarding the Examiners objection to the Drawings not showing a "restricted base station", this term ("restricted") has been deleted from the claims. Applicants believe that all claimed features relating to a "base station" are shown in the drawings and do not believe that any corrections are now necessary.

Regarding the Examiner's objection to the specification, a paragraph numbered specification will be submitted in due course.

Regarding the Examiners objections to the claim language, the terms "restricted base station" and "pre-registered", have been amended to recite a "base station" and "registered" respectively, thereby overcoming this objection and other related rejections.

Regarding the Examiners rejections under section 112 first paragraph, the terms "restricted base station" and "pre-registered" have been amended thereby overcoming this rejection.

Regarding the Examiners rejections under section 112 second paragraph, the terms "restricted base station" and "pre-registered" have been amended thereby overcoming this rejection.

Regarding the Examiner's rejections of the claims 15-17, 21-22 and 25-27 as not further limiting method claims, these claims have been amended to recite the equivalent subject matter in proper method form. Therefore Applicants now believe the dependent claims are in proper form and overcome any section 112 rejections.

In conclusion, Applicants respectfully submit that claims 9-29 as amended now define over the prior art references of record and avoid any section 112 rejections. Applicants would again like to thank Examiner Cumming for his time and effort and consideration of this application. The Examiner is encouraged to call Steven Kelley at (202) 434-1630 to discuss any matters necessary to further advance the prosecution of this application.

Respectfully submitted,
Perkins Coie LLP
